

Chicken pox vaccine victim

nov 2008

A dear friend of mine is currently driving to TX because her brother is in the hospital. He was given the chicken pox vaccine because of his work, and had a bad reaction. His first symptom was a swollen arm - and it's gotten much worse from there. The last she heard, his kidney's were compromised, and he's not doing well at all. This is a 48 yr old man, who may lose his life because of the vaccine.

Just one more thing to add to my long list of reasons for keeping my daughter free of these deadly chemicals!

Just had to vent a bit - it's so frustrating and infuriating that so many people continue to be poisoned.
