# HEALTHY BABIES DON'T JUST DIE

## Healthy Babies That Get Vaccinated Do

### Actual Case Numbers from the *Vaccine Adverse Event Reporting System* (VAERS)

160271	4 month old boy gets shot, gets diarrhea, goes into coma, and dies same evening.
49808	4 month old girl gets shot, develops bleeding disorder, encephalitis, and abnormal liver function. Dies three days later.
76188	6 month old girl gets shot, develops diarrhea and bleeding lesions, dies two days later.
49035	7 month old girl gets shot, develops cerebral hemorrhage, and dies four days later.
160183	9 month old baby gets Engerix-B and died 18 hours later.
180302	10 month old girl gets shot, gets bacterial infection, bronchiolitis, goes into coma, and dies day after shot.
74126	10 month old girl gets shot, it causes liver cancer, and she ultimately died of it.
173745	18 month old girl gets shot, later that evening found dead with profuse bleeding from mouth and nose. "

### SMALLPOX VACCINATION

**"For years past the strain of countenancing such a procedure reckless, dirty, and dangerous as vaccination from the cow has been growing unbearable to bacteriological experts. The natural ignorance of the public, countenanced by the erroneousness of the ordinary general medical practice, has made such a barbarism as vaccination possible. . . Recent experiments have shown that an inoculation made in the usual manner by a practitioner's light-hearted way, without previous laboratory examination of the state of the patient's blood, is just as simple manslaughter as a cure or preventive. But nothing short of attempted murder. A skilled bacteriologist would as soon think of cutting his child's arm and rubbing the cowpustule dustpan into the wound, as vaccinating it in the**

## MEASLES VACCINE GENOCIDE

**"It was similar with the measles vaccination. They went through Africa, South America and elsewhere, and vaccinated sick and starving children...They thought they were wiping out measles, but most of those susceptible to measles died from some other disease that they developed as a result of being vaccinated. The vaccination reduced their immune levels and acted like an infection. Many got septicaemia, gastro-enteritis, etcetera, or made their nutritional status worse and they died from malnutrition. So there were very few susceptible infants left alive to get measles. It's one way to get good statistics, kill all those that are susceptible, which is what they literally did."**

### FLU VACCINE DEATHS

**"In 1976 I was working in the Gulf Country around Cape York, in an aboriginal community of about 300 people. The Health Department sent around a team and vaccinated about 100 of them against flu. Six were dead within 24 hours or so and they weren't all old people, one man being in his early twenties. They threw the bodies in trucks to take to the coast where autopsies were done. It appeared they had died from heart attacks".**

## Another teen dies from flu after receiving flu shot

A second Minnesota teenager has reportedly died from complications of infection with influenza Type A during this current flu season, prompting health officials across the state to urge the public to get flu shots for their own protection. But missing from many of the news reports on this tragedy is the fact that the child in question, 14-year-old Carly Christenson, had already been vaccinated for influenza before flu season even started, proving the utter failure of flu shots to protect against the flu.

“Vaccination is a gigantic delusion; ...it has never saved a single life; but that it has been the cause of so much disease, so many deaths, such a vast amount of utterly needless and altogether undeserved suffering, that it will be classed by the coming generation among the greatest errors of an ignorant and prejudiced age, and its penal enforcement the foulest blot on the generally beneficent course of legislation during our century.”

Alfred Russel Wallace, O.M., F.R.S. (1898)

In passing, it is significant to note that this official inquiry elicited the fact that these six little victims of vaccination had all been buried under misleading death certificates, no word as to vaccination appearing on any of those documents. That practice of “preserving vaccination from reproach ” is believed to be common, and if the suspicion be well founded, it shows how our national vital statistics are considerably vitiated and the public deceived.”

J.T. Biggs (1912)

"I have myself, through Natural Hygiene, over 16 years, treated all forms and hundreds of cases of typhus and typhoid fevers, pneumonia's, measles and dysentery's, and have not lost a single patient. The same is true of scarlet and other fevers. No medicine whatever was given."

R.T. Trall M.D. (1860)

"The Chief Medical Officer of the Board of Education, SIR GEORGE NEWMAN, has described the procedure as a 'safe, practical and efficient method of protection.' ...No reference to the disasters which have been recorded in various parts of the world, nor to the severe reactions which are a frequent sequel to the inoculation, is made in these official statements."

M. BEDDOW BAYLY M.R.C.S., L.R.C.P. (1939)

priority because they cause a weakening of the immune system. I  
know that may be hard to accept, but it's true. The medical cartel,  
at the highest level, is not out to help people, it is out to harm  
them, to weaken them. To kill them. At one point in my career, I

"In 1999 I .....proposed the hypothesis that ..... scientists might have unwittingly started the pandemic through an experimental oral polio vaccine (OPV) ....in central Africa in the 1950s. .... it sparked a major cover-up among those who had been involved with making the vaccine, and among powerful interest groups within the medical community. The attempted whitewash persuaded me to continue my researches. I have now been exclusively researching AIDS for 20 years, and its origins for 16. And whereas I was 95% persuaded of the merits of the vaccine theory when The River was published in 1999, I am now (in 2006) 99.9% persuaded that this is how AIDS began."

"At the main hospital in Mbarara during that month of 1977 more than 600 children had died following (oral) polio vaccination. 600 children! So even some of the timid medical practitioners who were initially afraid to come out, started coming out giving information and saying 'Oh, we knew this oral polio vaccine was trouble because as soon as the child receives it, they get a temperature and their health goes downhill and there is nothing that you could do.' Prior to contemporary vaccination programs, 'Crib death' was so infrequent that it was not mentioned in infant mortality statistics. For the first time in history, most US infants were required to receive several doses of DPT, polio, measles, mumps, and rubella vaccines. Shortly thereafter, in 1969, medical certifiers presented a new medical term—sudden infant death syndrome. In 1973, the National Center for Health Statistics added a new cause-of-death category—for SIDS—to the ICD. SIDS is defined as the sudden and unexpected death of an infant which remains unexplained after a thorough investigation.

# 40 deaths linked to child vaccines over seven years

**Sarah-Kate Templeton**  
Health Editor

FORTY children are suspected to have died as a result of receiving routine vaccines in the past seven years.

Childhood vaccinations are also suspected to have left two young children with brain injuries and caused more than 1,500 other neurological reactions, including 11 cases of inflammation of the brain, 13 cases of epilepsy and a coma.

The data, disclosed by the Medicines and Healthcare products Regulatory Authority (MHRA) following a request by The Sunday Times under the Freedom of Information Act, shows that, since 2003, there have been more than 2,100 serious adverse reactions to childhood vaccines, some of which were life-threatening.

Fifteen injections are given routinely to young children as part of the government's vacci-

nation programme. They offer protection against diseases such as polio, diphtheria, mumps and measles.

The MHRA says the deaths and neurological reactions should be seen in the context of the 90m doses of childhood vaccines which have been given since 2003.

Details of the suspected deaths and neurological problems have been released just two months after a legal ruling forced the government to accept that its vaccination programme had left a baby severely brain damaged.

Thirteen years after first refusing to acknowledge that Robert Fletcher, now 18, had been left severely brain damaged by the MMR vaccine for measles, mumps and rubella, the government was forced to pay him compensation.

Robert's mother, Jackie, who founded Jabs, a support group for families with vaccine-

**George Fisher died in 2006**

damaged children, said: "It is generally accepted within the medical profession that only about 10% of suspected adverse reactions get put forward in the correct way. It is accepted by the Department of Health that the full scale of the problem is far greater than these statistics show."

Jake Dukes, 18, from Weymouth, Dorset, was left severely brain damaged by the whooping cough vaccine which he received when he was two months old. He has the mental age of a toddler, is incontinent and uses a wheelchair. He was awarded £91,500 under the government's vaccine damage payment scheme.

The family of George Fisher are convinced that the MMR vaccine contributed to the death of their 18-month-old son. He died 10 days after being inoculated in January 2006.

His mother, Sarah, a hotel receptionist, believes that an existing illness made George susceptible to an adverse reaction to the vaccine.

She said: "George had had a bad virus. He had been very ill and had suffered a convulsion due to his high temperature. I don't think it was just the MMR, but I think it was a factor in his death."
