Added 6/19/01

VAERS ID 134249 An infant received the DTaP, HBHepB and IPV vaccines on 2/8/00. Foster mom found her dead 5 days later. Autopsy performed, preliminary conclusion SIDS. (California)

VAERS ID 134072 An infant received the DTaP, HBHepB and IPV vaccines on 1/25/00. 6 days later she was found not breathing at the babysitter's. Resuscitation was to no avail. (Ohio)

VAERS ID 134070 An infant received the DTaP vaccine on 1/4/00. 3 days later she was found not breathing, with no pulse. Death certificate lists cause of death as SIDS; autopsy revealed no abnormalities. (Ohio)

VAERS ID 133895/134068 A 5 year-old received the DTP, MMR and OPV vaccines on 1/25/00. Subsequently she developed a fever which progressed to seizures on 2/2/00. She then went into a coma, progressing to organ failure. Life support was discontinued and she died on 2/4/00 (10 days later). Says "Reported cause of death" and that's it. Later her file was updated to say "1 wk post vax, pt devel severe fatal encephalopathy". (New Jersey)

VAERS ID 133897 An infant received the DTaP vaccine on 2/10/00. That same day mother found him cold and limp when she checked on him during his nap. Arrived at ER in asystole, dead on arrival. (Florida)

VAERS ID 133896 An infant received the DTaP, HBHepB and IPV vaccines on 1/13/00. 2 1/2 days after the vaccine she died a sudden death - probably SIDS, coroners report pending. She was fine between the vaccination and her unexpected death. The reported writes "I doubt this is related to the vaccines, but wanting to be thorough". (Colorado)

Added 6/18/01

VAERS ID 150243 A one year-old received the DTaP, HIBV, IPV, HepB and MMR vaccines on 3/7/00. No reaction or illness was noted after the vaccine until the morning of 3/11/00 (4 days later) when he was playing and then laid down on the couch and started shaking and stopped breathing. (American Samoa?).

VAERS ID 134672 An infant received the DTaP, HibV, IPV and HepB vaccines on 1/12/00. There were not signs, no symptoms, found dead 5 days later. Autopsy findings (per grandmother) stated that he died of SIDS. (Texas)

VAERS ID 134583 An infant received the DTaP, HibV, IPV and HepB vaccines on 2/29/00. That night mom put her on two soft pillows on the floor to sleep (around 11:15PM). Did not check on her until around 9AM the next morning. Found her dead. (Florida)

VAERS ID 134577 An infant received the DTaP, HBHepB and IPV vaccines on 3/2/00. The next day he was found dead in his sleep. (Texas)

VAERS ID 134249 An infant received the DTaP, HBHepB and IPV vaccines on 2/8/00. 5 days later she was found dead. Preliminary autopsy - SIDS. (California)

Added 6/17/01

VAERS ID 151749 An infant received the DTaP, HBHepB and IPV vaccines on 4/4/00. 9 or 10 days post vax she died of SIDS. (Pennsylvania)

VAERS ID 151748 An infant received the DTaP, HBHepB and IPV vaccines on 3/22/00. 26 days later he died of SIDS. Autopsy being performed. (Pennsylvania)

VAERS ID 151662 An infant received the DTaP, HibV and IPV vaccines on 5/2/00. The next day he was found dead in his crib by his parents. (Connecticut)

VAERS ID 151621 An infant received the DTaP, HibV and IPV vaccines on 5/2/00. The next day he was found apneic and asystolic, tied up in blankets (24 hours post vaccination). (Connecticut)

!!!!NOTE: The prior two deaths occurred as a result of vaccinations in the same state on the same day, with death occurring the following day. They have different birth dates, so are probably not the same child. Could this be a hot lot situation?

VAERS ID 151620 An infant received the DTaP, HBHepB, and IPV vaccines on 4/17/00. That same day he died of SIDS. (Mom brought him to the hospital because he had stopped breathing.) (Louisiana)

VAERS ID 151619 An infant received the DTaP, HBHepB, and IPV vaccines on 4/10/00. Do not know when this happened, but he experienced vomiting, diarrhea, dehydration. Was hospitalized for 20 hours because of the dehydration. He went into

cardiac arrest and was transferred to ICU where he continued to arrest and sustained organ failure. (California)

VAERS ID 151618 An infant received the DTaP, HBHepB, and IPV vaccines on 5/2/00. 2 days later mom found him dead in his crib. He had been fed formula at 3AM and was returned to his crib. He seemed to be sleeping later than usual, and when the mom checked on him at approximately 8AM, he was on his back and unresponsive. (Pennsylvania)

VAERS ID 151190 An infant received the DTaP, HBHepB and IPV vaccines on 4/6/00. 3 days later, after going to bed at 3AM with mother, he died of SIDS. (Oregon)

VAERS ID 150974 An infant received the DTaP, HIBV and IPV vaccines on 3/29/00. 4 days later she died of suspected SIDS. (Washington)

VAERS ID 150931 An infant received the DTaP, HIBV and IPV vaccines on 3/31/00. That night she was fine when she sent to sleep at around 10:PM. At 6AM she was found not breathing. She had been put to sleep on her side but was found on her stomach. (Massachusetts)

VAERS ID 150874 An infant received the DTaP, HIBV and IPV vaccines on 4/6/00. The same day he was taken to the ER, lifeless and not breathing. He was cool with rigor mortis. Mom had fed at 1:30PM and he was fine. At 5PM noted to be pale and lifeless. CPR began and brought to ER. (Texas)

VAERS ID 150618 An infant received the DTaP, HIBV and IPV vaccines on 3/15/00. Don't know when she died. Says "No adverse reaction to immunizations. Unknown states as far as we know, patient did not have reaction (fever, etc.)." ??? (Arizona)

VAERS ID 150475 An infant received the DTaP vaccine on 3/15/00. 2 days later he presented to the ER in full cardiac arrest. (Illinois)

VAERS ID 150474 An infant received the DTaP, HIBV and IPV vaccines on 3/16/00. Says "Accidental suffocation 24 hour post vax". ??? (Montana)

Added 6/16/01

VAERS ID 152501 An infant received the DTaP, HIBV and IPV vaccines on 1/14/00. 5 days later she died of SIDS. (New Hampshire)

VAERS ID 152417 An infant received the DTaP, HibV and IPV vaccines on 5/22/00. 3 days later he died of SIDS. (Ohio)

VAERS ID 152301 An infant received the DTaP, HBHepB and IPV vaccines on 4/17/00. Less than 24 hours later he had died of SIDS (official coroner's report confirms). (Ohio)

VAERS ID 152213 An infant received the DTaP, HibV, IPV and HepB vaccines on 3/30/00. The next day he died. Mother reports infant fussy night of 03/30/00. Laid infant on stomach and his back was patted. Infant and mother fell asleep. Mother woke up and infant not breathing. Mother called 911. (Arizona)

VAERS ID 152001 An infant received the DTaP, HibV, IPV and HepB vaccines on 4/13/00. Five days later she died of SIDS. (Maine)

VAERS ID 151867 An infant received the DTaP, HBHepB and IPV vaccines on 5/10/00. The next day he was found lifeless, unresponsive and transported to the hospital. CPR was unsuccessful. Diagnosed SIDS. (Georgia)

1999 - An ongoing sampling of cases reported to VAERS

VAERS ID 118334 An infant received the DTaP, HepB, HibV, IPV and some vaccine starting with "R" on 1/14/99. On the 17th, 3 days later, late onset group B strep sepsis and meningitis were diagnosed. He had an elevated temperature two days following the vaccines, which was treated with acetaminophen. On the 17th he was back to normal, but in the afternoon woke up ashen, with fever up; take to ER - meningitis. Prior condition - prematurity (25 weeks)/retinopathy of prematurity. Other meds: syarages by med-immune lot# 810834 given 1/14/99. This illness was considered life-threatening, the child was hospitalized for 14 days and HAS NOT recovered. (Missouri)

VAERS ID 118586 An infant received DTaP, HepB, HibV and OPV vaccines on 1/25/99. The next day she had a fever (103.7), seizures, lethargy. She was hospitalized for one day. This illness was considered life-threatening. She has since recovered. (West Virginia)

1998 - An ongoing sampling of cases reported to VAERS

VAERS ID 115144 An infant received DTaP, HibV, IPV and HepB vaccines on 6/26/98. 8 days post vaccination, he had a prolonged apneic episode requiring resuscitation with subsequent seizure and neurological damage. Previously had perinatal asphyxia. This illness was considered life threatening, and he was

hospitalized for 12 days. He is considered disabled, and HAS NOT recovered. (Wisconsin)

1997 - An ongoing sampling of cases reported to VAERS

[search the site](#)

Added 6/19/01

VAERS ID 133879 An infant received the DTaP vaccine on 10/31/97. The next day he or she (doesn't say which) died. Autopsy state cause of death unknown, possibly SIDS. (New York)

Added 6/17/01

Added 6/16/01

VAERS ID 108977 An infant received the DTPH and OPV vaccines on 1/8/97. Just says undetermined cause of death, adverse event onset date = 1/22/97 (14 days later). (New Hampshire)

VAERS ID 151841 A one year-old received the DTP and HIBV vaccines on 8/11/97. He experience high pitched screaming, fever, diarrhea for over a month and a personality change. Later he had seizures. This child had developed beautifully his first year of life. All expected milestones were on time or sooner than anticipated. He was talking at 10 months. He has NOT recovered and is considered disabled. (New Jersey)

Added 6/11/01

VAERS ID 108077 An infant received the DTaP, HIBV, and OPV vaccines on 4/28/97. That afternoon the babysitter found her dead; was taken to the ER; autopsy results are pending, however ER staff attributed this event to SIDS. (Texas)

VAERS ID 114917 An infant received the DTaP, HIBV, OPV and HepB vaccines on 9/15/ or 9/16/97 (text says one thing, immunization date field says another). She died 5 or 6 days later (SIDS). Parents requested VAERS report on the 1 year anniversary of her death (says 9/22/98??). (Washington)

VAERS ID 100355 An infant received the DTaP, HIBV, IPV and HepB vaccines on 6/10/97. Two days later he died of apparent SIDS. (New York)

Added 6/10/01

VAERS ID 106657 An infant received the DTaP, HIBV, IPV and HepB vaccines on 12/8/97. A medical examiner pronounced her dead the next day at 1:36PM. An autopsy to be performed. (Tennessee)

VAERS ID 106256 A one year-old received the DTaP, HIBV, HepB and MMR vaccines on 12/10/97. On the 14th, 4 days later, he developed an elevated temperature, poor appetite, weakness. The next day his temp increased and he was taken to the hospital and admitted. It does not say he left the hospital, but then says on the 16th, the next day, he was taken to the hospital with increased temp, convulsions, difficulty breathing. On the 17th, his temp decreased, became unresponsive and unable to communicate. He died, but it does not say when. It says he was hospitalized for 4 days. (Texas)

VAERS ID 108794 An infant received the DTaP, OPV, HIBV, and HepB vaccines on 5/29/97. 9 days later she died of SIDS. (New Hampshire)

Added 6/7/01

VAERS ID 112938 A one year old received DTP and OPV vaccines on 11/5/97. On 1/2/98 she began not eating well, had diarrhea for one day, developed a slight rash on her face and on her vaginal area; she was put down for a nap and was found in bed not breathing. Pronounced dead at the hospital. (New Jersey)

VAERS ID 107771 An infant received DTP and OPV vaccines on 10/31/97. It says the onset of symptoms, fever, crankiness, sleepless started the next day. It says he died, but doesn
