[Bioweapons sold to Saddam by US](#)  
[Vaccines "classified" \(ie experimental therefore illegal\)](#)

I talked to guys in the tank division because I took care of them when they came back. I was one of the doctors who helped discover the cause of Gulf War Syndrome, which of course is depleted uranium and the anthrax vaccines that are relabelled 20 years old, etc. [\[2004\] Interview of Dr. William \(Bill\) Richard Deagle, MD](#)

Terry Jemison at the U.S. Department of Veterans Affairs stated in August 2004 that over 518,000 Gulf-era veterans (14-year period) are now on medical disability, and that 7,039 were wounded on the battlefield in that same period. Over 500,000 U.S. veterans are homeless. In some studies of soldiers who had normal babies before the war, 67 percent of the post-war babies are born with severe birth defects - missing brains, eyes, organs, legs and arms, and blood diseases. [\[2006\] Depleted Uranium is WMD by Leuren Moret](#)

"Some people claim Saddam's chemical and biological weapons are to blame for the condition while others say it's down to depleted uranium," adds Dr McClure. "Yet the first group I looked at were French troops who would have been exposed to those. None of them came down with Gulf War Syndrome. "They did not receive the vaccine prior to going out because their commander-in-chief did not trust it. So what does that suggest? "I also studied a second control group that included a considerable number of soldiers who'd been given vaccines but did not go out. They did develop GWS symptoms.[\[Media Aug 2004\]Top-selling author says flawed vaccinations caused disease. Scientist blasts MoD over Gulf War Syndrome](#)

A military policeman posted mainly at an airfield in Saudi Arabia, Brad, along with 150,000 other American soldiers, took a vaccine--on his commander's orders--against weapon-borne anthrax. A second vaccine, against botulism, was administered to 8,000 soldiers. A staff report issued last December by the Senate Committee on Veterans' Affairs concluded that "Persian Gulf veterans were . . . ordered under threat of Article 15 or court-martial, to discuss their vaccinations with no one, not even with medical professionals needing the information to treat adverse reactions from the vaccine." The Senate report noted that the particular botulinum toxoid issued "was not approved

by FDA." Other details from the survey: Of responding veterans who had taken the anthrax vaccine, 85 percent were told they could not refuse it, and 43 percent experienced immediate side effects. Only one fourth of the women to whom it was administered were warned of any risks to pregnancy. Of all responding personnel who had taken the antitoxin medicine, 88 percent were told not to turn it down and 35 percent suffered side effects. None of the women given botulinum toxoid were told of pregnancy risks. "Anthrax vaccine should continue to be considered as a potential cause for undiagnosed illnesses in Persian Gulf military personnel," said the report in one of its summations. And in another: "[The botulinum vaccine's] safety remains unknown." [\[Media Aug 2004\] THE TINY VICTIMS OF DESERT STORM](#)

Prof Simon Wessely said a series of studies by his team at King's College, London, pointed to the vaccinations given to those who served in the 1991 Gulf War as a major factor in the illnesses they subsequently suffered. "The more vaccines you received, the more likely you were to suffer ill-health," he told the public inquiry in Gulf war illnesses. "Those who had the most vaccinations were nearly twice as likely to get ill. We still haven't got that right. We're still getting problems with anthrax vaccinations now.".....Prof Wessely said troops given the combination of whooping cough vaccine and anthrax vaccines were 40 per cent more likely to suffer the symptoms attributed to the so-called Gulf War Syndrome. [\[Media Aug 11, 2004\] Gulf war vaccine still a problem, leading scientist tells inquiry](#)

### **Cover-up and records destroyed**

Today, Walker suffers from a number of illnesses and strongly believes there has been a massive cover-up. "My wife is ill and my little girl is ill, too," he said during a telephone interview, then added that his "medical notes from the RAF hospital have gone missing". However, like events in Britain, important and potentially incriminating records have mysteriously gone "missing". Two US Marines at Camp Pendleton, San Diego, have gone public to say **they observed "hundreds of records from the Gulf War being destroyed"** [GULF WAR SYNDROME Biological Black Magic by David G. Guyatt](#)

"However, when I asked questions about the cocktail of drugs within the vaccines I was told some were classified under the Official Secrets Act." He claims his findings developed even more significance when the MoD admitted to him that **72 per cent of veterans' medical records had gone missing since the war ended.** [\[Media Aug 2004\] Top-selling author says flawed vaccinations caused disease. Scientist blasts MoD over Gulf War Syndrome](#)

### **Bioweapons sold to Saddam by US**

A 1994 Senate Report, entitled "Arming Iraq: The Export of Biological Materials and the Health of Gulf War Veterans", underscores the biological threat possessed by the

Iraqis. More often referred to as "the Riegle Report", named after its author, Donald J. Riegle, Jr, the Report itemises biological cultures supplied to Iraq by the US. Riegle and his team identified no less than 61 batches of biologically hazardous materials exported to Iraq. "Between the years 1985 and 1989, the United States Government approved the sales of quantities of potentially lethal biological agents that could have been cultured and grown in very large quantities in an Iraqi biological warfare program," Riegle stated. These included pathogenic materials, "which means disease-producing items, and toxigenic, meaning poisonous items." The Report added that "we were not able to get any records prior to 1985". Riegle then included an extract from a Department of Defense summary report written in 1992:

Other biological agents provided by the US to Saddam Hussein's biological warfare program included *Histoplasma capsulatum*, which can cause symptoms resembling tuberculosis and lead to the enlargement of the liver and spleen as well as anaemia and skin disease-symptoms that many veterans now exhibit. Another organism was *Brucella melitensis*, which, when 'weaponised', causes chronic fatigue, profuse sweating and loss of appetite, joint pains, insomnia and nausea, and can potentially result in major damage to the vital organs. Again, these symptoms reflect the conditions experienced by thousands of Gulf War veterans. In addition to the foregoing, shipments to Iraq also included "E. coli and genetic materials, human and bacterial DNA" [GULF WAR SYNDROME Biological Black Magic by David G. Guyatt](#)

Stories also circulating of a genetically engineered organism being used in the Gulf War are paralleled by stories from British veterans who also claim the use of a modified mycoplasma organism. These vets include Angus Parker who had earlier said it was "an infectious organism manufactured in the US". Oddly enough, this is one of the enduring aspects of the "Octopus" story involving engineered bio-organisms supplied to Iraq by the Wackenhut Corporation, the giant US private-sector security company whose board of directors reads like a roll call of military and intelligence alumni. It is an allegation supported by US investigative journalist Carol Marshall in her manuscript, "The Last Circle". [GULF WAR SYNDROME Biological Black Magic by David G. Guyatt](#)

Marshall has spent years investigating the allegations of Michael Riconosciuto-a former CIA scientific whiz-kid. Riconosciuto claimed that while working for the Wackenhut Corporation at its Cabazon Indian Reservation facility he developed advanced and genetically altered biological warfare agents. One such agent, he alleged, was a "race-specific" organism, genetically engineered to attack certain races or groups. Unleashed it could kill or render ill all those of a particular ethnic group, leaving others entirely unharmed. [GULF WAR SYNDROME Biological Black Magic by David G. Guyatt](#)

### **Vaccines "classified" (ie experimental therefore illegal)**

How many vaccines were classified secret? The Surgeon General, Vice Admiral Revell, during a "behind closed doors" meeting of Parliament's Defence Committee, was asked, "How many vaccines do we not admit to?" He replied, saying, "I think probably about **five or six.**" All previously classified vaccines were declassified on 10 December 1996, according to a letter dated 20 January 1997 from the Ministry of Defence. A spokesman at the MoD confirmed this in a telephone call on Friday 30 May 1997, adding that there were only three vaccines that had ever been classified. He told me these were: anthrax, pertussis and plague. This statement is confirmed in a letter to Shaun Rusling, dated 20 January 1997, in which the MoD confided that "the vaccines you were given against potential biological warfare threats were anthrax, pertussis (as an adjuvant) and plague. These are the only vaccinations which have ever been classified." This is a far cry from the testimony of Surgeon General Revell in the closed-door hearings of the Defence Committee in which he said there were "five or six" vaccines which were "not admitted to". I posed this discrepancy to the Ministry of Defence. Surgeon General Revell's testimony before the Defence Committee was "a misunderstanding", the MoD spokesman said. Despite this "misunderstanding", the medical records of Corporal Richard Turnbull clearly state that **four** vaccines-not three-were classified secret. [GULF WAR SYNDROME Biological Black Magic by David G. Guyatt](#)

"Similarly, U.S. legislators learned in 1999 the little reported fact that Gulf War troops, as many as 200,000, were unwittingly used in AIDS vaccine experiments wherein portions of the AIDS virus, HIV, were recombined with a pathogenic mycoplasma, isolated, tested, and then patented by Dr. Shyh-Ching Lo of the Armed Forces Institute of Pathology for the American Registry of Pathology in Washington, D.C. The patent is reprinted and discussed in this authors book, Healing Codes for the Biological Apocalypse (Tetrahedron Publishing Group, 1999)."--Dr [Horowitz](#)

"Scientists at The Institute for Molecular Medicine have found that slightly under one-half of the very sick Gulf War Illness patients in a pilot study with the signs and symptoms of Chronic Fatigue Syndrome or Fibromyalgia have chronic invasive infections involving certain uncommon mycoplasmas, such as *Mycoplasma fermentans* (incognitus strain). "--[Dr Nicolson](#)

"Mycoplasma fermentans (incognitus) has been tested on the Texas Department of Corrections prisoners in the late 1980s prior to the Gulf War. It was tested on death row inmates as well as other inmates in Huntsville, Texas. The guards then contracted it from the inmates, and the guards then gave it to their families and community. This mycoplasma vaccine testing was funded by the U.S. Army, and today there is an outbreak of 350 people in the Huntsville area with a strange disease resembling GWS."--[Dr Nicolson](#)
