

Julie Gerberding Admits on CNN that Vaccines can Trigger Autism

2008 <http://adventuresinautism.blogspot.com/2008/03/julie-gerberding-admits-on-cnn-that.html>

This weekend Julie Gerberding, the head of the CDC, appeared on Dr. Sanjay Gupta's show, House Call, and explained that vaccines can trigger autism in a vulnerable subset of children. This is the claim that parents like me have been making since at least the 80's, and have been dismissed and even mocked for making it.

But no one in the main stream media seems to have noticed. Not even CNN. Not even Dr. Gupta who was sitting right in front of her.

Apparently, if you dress in soft pink and speak in dulcet, reassuring tones, you can indict yourself in the biggest international health crisis of the times and not even your interviewer will notice.

It is time for Dr. Gerberding to be forced to give cogent answers to the difficult questions that it is her responsibility to truthfully address. From all I have seen, it will take an act of Congress to do it.

I am joining Hannah Poling's parents in calling for the immediate release of the Poling case documents, and calling for congressional hearings into the autism cases in the Vaccine Injury Compensation Program.

This obfuscation and double speak must end.
