

Julie Gerberding

[\[back\]](#) [Experts](#) [CDC](#) [Merck](#)

[[Revolving door](#) former head of the [CDC](#), became head of [Merck](#) Vaccine Division upon leaving her government job.]

[CDC whistleblower's secret letter to Gerberding released by Natural News as mainstream media desperately censors explosive story](#)

[In a newly released FOIA document obtained by a scientist](#), you can read correspondence between

Dr. Julie Gerberding, Director, Centers for Disease Control and Prevention, (CDC) and

Damian Braga, President of Aventis Pasteur. An orderly "phase down" of thimerosal (mercury preservative) still in pediatric flu shots was supposed to begin in 2004, but based on the correspondence, Dr. Julie Gerberding indicates no interest in providing U.S. children with pediatric thimerosal-free flu shots. Almost ten years later, the U.S. is still allowing thimerosal-containing flu shots to be used in infants, pregnant women, children and the elderly. <http://www.ashotoftruth.org/featured-vaccines/flu-shot>

THE BIG PHARMA "REVOLVING DOOR"

Dr. Julie Gerberding, who was the head of the CDC from 2002 to 2009 (the same period during which Glaxo, Pfizer, and Merck have admitted to vaccine fraud) is now the president of Merck's global vaccine division.

FACT: ONE OF THE REASONS THE CDC GIVES SO MANY TAXPAYER DOLLARS TO MERCK EVERY YEAR IS BECAUSE MERCK MANUFACTURES 14 OF THE 17 VACCINES THE CDC "RECOMMENDS" FOR CHILDREN, AND 9 OF THE 10 "RECOMMENDED" FOR ADULTS.
