## **8 year old Dutch boy died 3 days after receiving a MMR/DTP vaccine**

01 dec 2009

THE HAGUE - The National Ombudsman, Alex Brenninkmeijer, will investigate complaints of parents whose 8-year old son is deceased after being vaccinated with the MMR-called DTP. That made the ombudsman said Tuesday.

The National Institute for Health and Environment (RIVM), the parents have not properly informed about the complications that can occur after a vaccination. "They also complain about the RIVM the link between the vaccination and the death of their son has been studied insufficiently independent," says Brenninkmeijer.

The family Hagoort out on March 9, 2009 Barendrecht had watched their eight year old son Freek three days after an MMR-DTP vaccination and death.

Meanwhile there is already much attention to the sudden death of Fletch, so devoted to TV A Day on May 22 this year a report on this matter. Also there is now a website of the foundation know more about Fletch.
