

MMR vaccine failures

[\[back\] MMR vaccines](#) [\[back\] Vaccine Failures](#)

[It is not generally know but over 50% of measles/mumps/rubella cases have been vaccinated.]

"Take the 1991 measles epidemic. They calculated that this epidemic costs the country 8 million dollars to treat the 9,000 plus cases. I'm not sure about that figure, but the FACT that over 60% of those children were appropriately vaccinated was never taken into consideration in that calculation."--[Hilary Butler](#)

[Lawrence Solomon: Vaccines can't prevent measles outbreaks](#) Measles in highly immunized societies occurs primarily among those previously immunized

[Ohio State has the mumps, all but one infected were vaccinated](#)

[\[2009 Dec\] Not Immune From Mumps](#) But perhaps the most frustrating news to some parents is that most of the affected patients had received their proper two-dose vaccination as children — 83 percent, according to the CDC.

[Measles: vaccine isn't always enough \(Finland 1999\)](#)

[Measles outbreak puts focus on vaccine \(Alaska 1998\)](#)

Mumps outbreak in highly vaccinated school <http://www.ias.org.nz/mumps.htm>

[Resurgence of mumps in Singapore associated with Rubini vaccine](#)

[Journal articles of measles vaccine failure \(MMR\)](#)

"Study after study has demonstrated that many women immunized against rubella as children lack evidence of immunity in blood tests given during their adolescent years. Other tests have shown a high vaccine failure rate in children given rubella, measles, and mumps shots, either separately or in combined form."---[Dr Mendelsohn](#)

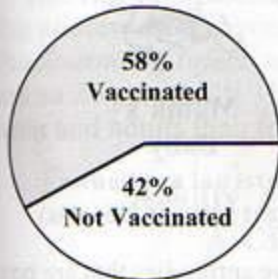

[Rubella Vaccination: a failure by Michael Nightingale](#)

[\[2007\] measles outbreak experience](#) I also managed to find out which 2 children had caught Measles. And guess what? Yes, both children who had caught measles had been immunised with the combined MMR at 13 months. Did the health workers inform the 2 mothers who contacted me of this fact? No. But it didn't stop them using

these cases to frighten the mothers into allowing their children to be immunised with the combined MMR. Utterly disgraceful. And they called themselves "professionals".

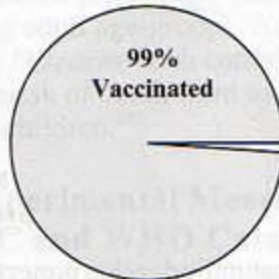

Outbreaks of Measles in Vaccinated Populations

1984

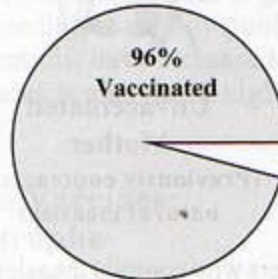

In 1984, 58% of all school-aged children in the U.S. who contracted measles were adequately vaccinated.

1985

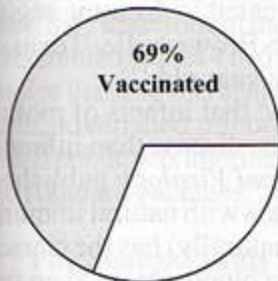

In 1985, there was a measles outbreak in Corpus Christi, TX. The population was fully vaccinated.

1986

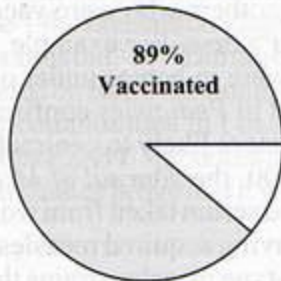

In 1986, there was a measles outbreak in Dane County, WI. 96% of the cases were in vaccinated people.

1988

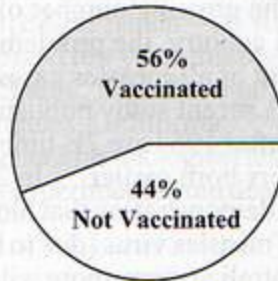

In 1988, 69% of all school-aged children in the U.S. who contracted measles were adequately vaccinated.

1989

In 1989, 89% of all school-aged children in the U.S. who contracted measles were adequately vaccinated.

1995

In 1995, 56% of all measles cases in the U.S. occurred in people who were previously vaccinated.

Measles Outbreak Blamed On Two Unvaccinated Children Despite 90 Percent of The Infected Being Vaccinated

The mainstream media continues to dig deeper hole for themselves, eroding their credibility to unimaginable levels after what can only be described as one of the most ludicrous attempts to cast blame on unvaccinated children for infections in the vaccinated. Several reports on a measles outbreak in New York City are accusing two children who were unvaccinated for the infections in 18 other vaccinated children. It's the new infectious rate logic that only vaccinate advocates can comprehend.

 PreventDisease.com

Once **MEASLES** and **CHICKEN POX** were **NORMAL!**

Now we have a **'new normal':**

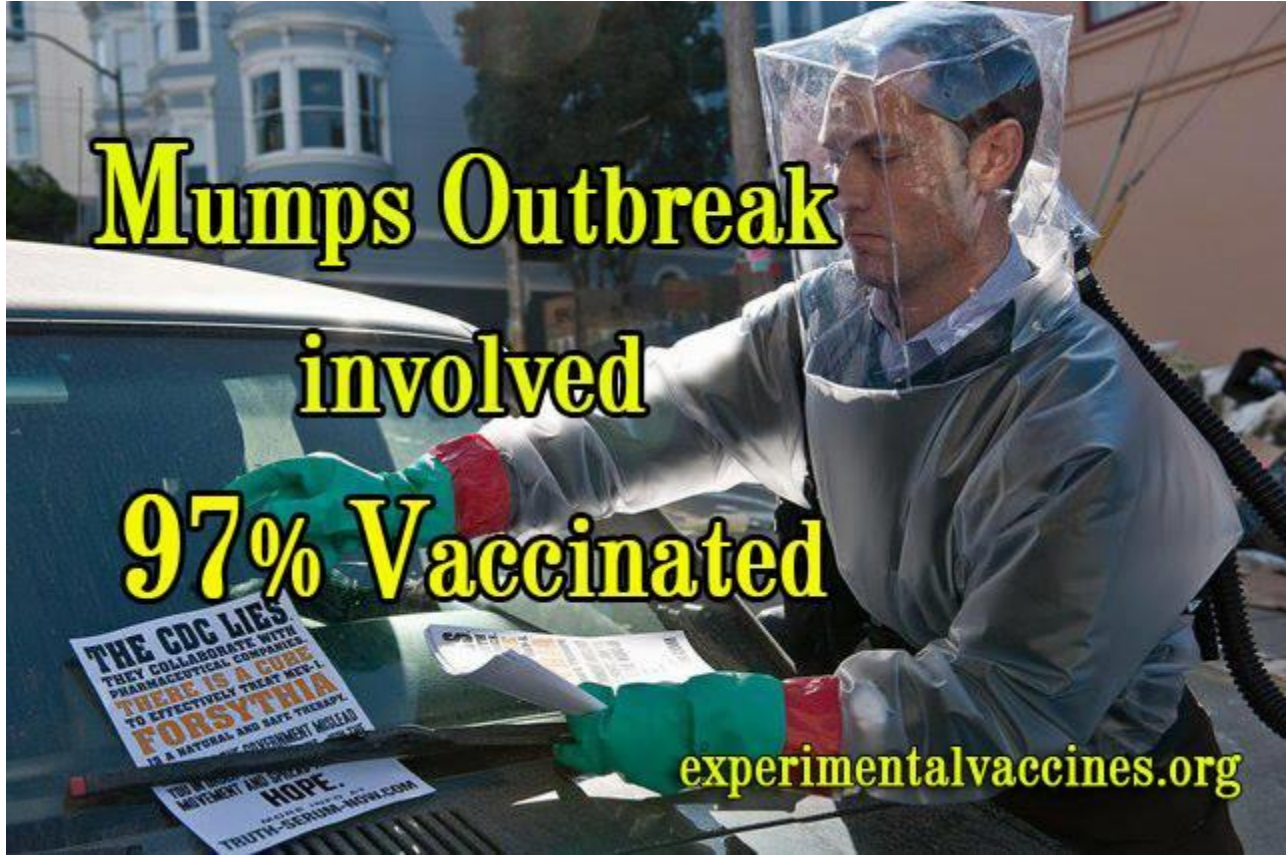

**AUTISM, TYPE-1 DIABETES, SEIZURES,
SIDS, ALLERGIES, BRAIN INJURED
CHILDREN, CHILDHOOD CANCERS, ETC.**

The **'old normal'** was short and provided life-long immunity ... The **'new normal'** leaves you with a vaccine injured child **FOR LIFE!**
