[\[vid\] Vaccines and Toxins Cause Autism, Sudden Infant Death Syndrome, SIDS & Crib Death](#) Dr. David Davis, MD gives insight into the multiple toxins along with an intensive vaccine schedule that ultimately contributes to the rise of Autism and Crib Death (Sudden Infant Death Syndrome, or SIDS). His book, "Dancing Cats, Silent Canaries—A Traditional Medical Doctor Takes A Closer Look At Unsolved Epidemics Of Autism & SIDS And Proposes A Solution," brings to light that multiple vaccines early in life combined with the highly toxic PVC used to make baby mattresses and cribs contribute to the alarming rate of Crib Death (Sudden Infant Death Syndrome, or SIDS) and Autism.

Boyd Haley Ph.D.

**‘Why do we have the highest infant death rate of 43 modern countries? If you can have the highest infant death rate and highest childhood, that is 1-5, death rate, of all the modern countries that is the equivalent in the first year of 16,000 babies dying that wouldn't need to die if we had Sweden's infant death rate...What are the children dying of to make us have such a high infant death rate? Are they dying of whooping cough or are they dying of SIDS, or are they dying of asthma related diseases caused by vaccines. No one wants to look at that or even discuss it or mention it. We have a sickness in this country, if you don't care for your children then you are in big trouble.....**

**.....when you can sit there and say we are satisfied that we spend all this money on medicine and still have the highest infant death rate in the world, your medical associations, your medical establishment is sick. It's either sick or it's criminal. Or both**

[vid] Vaccines Are Not Safe. Boyd Hayley lays out Dr Offit Haley Ph.D.,Boyd

Prior to contemporary vaccination programs, 'Crib death' was so infrequent that it was not mentioned in infant mortality statistics. For the first time in history, most US infants were required to receive several doses of DPT, polio, measles, mumps, and rubella vaccines. Shortly thereafter, in 1969, medical certifiers presented a new medical term—sudden infant death syndrome. In 1973, the National Center for Health Statistics added a new cause-of-death category—for SIDS—to the ICD. SIDS is defined as the sudden and unexpected death of an infant which remains unexplained after a thorough investigation.
