

Dr. Charles Creighton M.A., M.D.

[\[back\]](#) [Vaccine critics](#) [Smallpox](#)

CREIGHTON, CHARLES, M.A. Aberd. 1867, M.B. and C.M. 1871, M.D. 1878; M.A. Camb. (propter merita); (Aberd., Edin., Vienna, and Berlin); formerly Demonstrator of Anat. Univ. Camb.

One of 4 significant medical men to oppose smallpox vaccination (along with William Job [Collins](#), Walter R. [Hadwen](#), and Edgar [Crookshank](#)). He was asked to write an article for the Encyclopaedia Britannica on vaccination, which led him to the conclusion it didn't work. Consequently he was erased from the history books. The [whale.to](#) editor managed to get him onto [Wikipedia](#) (2006). You can see how the Allopathic editors there have suppressed all links to his books on this website and others [\[ref\]](#) [\[ref\]](#) [\[ref\]](#). He was one of the Vice presidents of the [The National Anti-Vaccination League](#) in 1921.

[Quotes](#)

[Banners](#)

"It is difficult to conceive what will be the excuse made for a century of cowpoxing; but it cannot be doubted that the practice will appear in as absurd a light to the common sense of the twentieth century as blood-letting now does to us. Vaccination differs, however, from all previous errors of the faculty, in being maintained as the law of the land on the warrant of medical authority. That is the reason why the blow to professional credit can hardly help being severe, and why the efforts to ward it off have been, and will continue to be so ingenious." [Charles Creighton M.D.](#)
