MEASLES VACCINE USELESS AND HARMFUL TO NATURAL IMMUNITY

"Vaccinating against measles is not just useless, but harmful. In the past, infants would not get measles. They would get the protection through their mothers, who used to have measles themselves. Mothers who were vaccinated against measles cannot pass on the protection to their infants, so infants now get measles."

Dr. Gerhard Buchwald M.D.

SMALLPOX VACCINE USELESS (KNOWN FOR AT LEAST 100 YEARS)

"During 10 outbreaks of smallpox between 1947 and 1974 nearly 100 people became ill with smallpox---even though they had been vaccinated."

Dr. Gerhard Buchwald M.D.

WHOOPING COUGH VACCINE PROVEN USELESS

"When in Germany, vaccinations against whooping cough were suspended between 1975 and 1991, the declining trend in the number of deaths from the disease continued as before."

ALLOPATHY FEEDS OFF VACCINE DISEASE (PSYCHOPATHY)

"Vaccinations are now carried out for purely commercial reasons because they fetch huge profits for the pharmaceutical industry.....There is no scientific evidence that vaccinations are of any benefit, but it is clear that they cause a great deal of harm...Today there are 800,000 children and youngsters under the age of 15 years (Germany) with asthma. 800,000! Neurodermitis, once a rare complaint, has become so common that there are several support networks with many thousands of members. The 'Frankenpost' of April 2004 reported an estimated 27 million people now suffer from hay fever, neurodermitis and allergic asthma in Germany."

HIGH VACCINATION LEVELS: THE REAL REASON

"The reason vaccinations are promoted with such intensity is to prevent people from realising that vaccines do not protect and also in the event of an outbreak or an epidemic the vaccinated are as much at risk of becoming infected as the unvaccinated. The truth can be kept hidden if people's vaccination status remains unknown and if everyone is vaccinated, making a comparison with unvaccinated people impossible. This is also the real reason for the relentless push to vaccinate as many children as possible."

[Dr. Buchwald MD](#) [Epidemic Fearmongering](#)

VACCINATION: A BUSINESS BASED ON FEAR

"Dr. med Martin Hirte writes on page 20 of his book 'Vaccination--Pro and Contra': 'To create fear among parents to strengthen their motivation to vaccinate is an important part of the publicity used to promote vaccinations. A whole branch of research is examining the question: What level of fear needs to be created to appear as convincing as possible?'"

Dr. Gerhard Buchwald M.D.

ALLOPATH TEXTBOOK LIES (SMALLPOX VACCINE)

"The (smallpox) unvaccinated Gabriele did not become ill as the vaccinated Waltraut. This did not agree with medical opinion. In their Textbook on Infectious Diseases, the authors GSELL and MOHR reproduced a photo of the two girls, but without their heads, and claimed that the girl with considerably more pustules on her body was the unvaccinated Gabriele, the girl with the less pustules the vaccinated Waltraut. It was however exactly the other way round: The unvaccinated Gabriele was less ill than the vaccinated Waltraut."

BCG VACCINE PROVEN USELESS (1971) 27 YEARS BEFORE REMOVAL IN GERMANY (1998). STILL IN USE UK, FRANCE (2013)

"After it was definitely known that the BCG-vaccine was ineffective and harmful it took the STIKO 27 years to remove the vaccine from its list of recommended vaccines. The only possible explanation for this behaviour is that the leading proponents of vaccination were reluctant to have to report such an embarrassing finding. In the sanatoriums, the ineffectiveness of this vaccine was already a known fact since the beginning of the 1960s, while its proponents defended it vehemently for another 40 years.....The vaccine continued to be used and children were being harmed by it....almost 500 (estimated) cases of vaccine damage per year (Germany)."

Dr. Gerhard Buchwald M.D.

THE VACCINATION RACKET

"The 'victory over epidemics' was not won by medical scientists--and certainly not by vaccines.....the decline...has been technical, social and hygienic improvements and especially of nutrition. Here the role of the potato...deserves special mention. Carefully whether you want to let yourself or your children undergo a dangerous, controversial, ineffective and no longer necessary procedure called vaccination, because the claim that vaccinations are the cause of the decline of infectious diseases is utter nonsense."
