

SMALLPOX VACCINATION BOOKS & PAMPHLETS

[\[back\] On line books](#) [\[back\] Smallpox](#) [Vaccine books](#)

[These are documents (mostly books) that *take to pieces and dispose of* smallpox vaccination, to paraphrase [William White](#), not forgetting the great [Dr Hadwen M.D.](#) To save some reading---see the effect of the smallpox vaccine in the [Phillipines 1905-1920](#)---if that doesn't break the Allopathic brainwashing, start from the top and work your way down the documents below.

You can see how the Allopaths have suppressed these books by observing their action on Wikipedia, where they delete or try to delete pages to the authors, eg [William Job Collins](#), [National Anti-Vaccination League \[ref\]](#) (still ongoing attempt there, and note they stopped all links to any of these books here), Charles Pearce etc, along with present day vaccine critics such as Robert Mendelsohn [\[ref\]](#), and so on. **See:** [Wikipedia](#)

Most of these books were supplied by [John Wantling](#), copied from books in Manchester library. Photocopies, done by John, are available for most of these, if wanted.]

PROVING VACCINATION A FAILURE.** ; fine, references @ end of chapters..
Baltimore,Peoples Printing Co.,1920.142 p.23 cm.,in original green
cloth,tables,references,an x-library copy.VACCINATION.This treatise is an
elaboration of a part of a prize thesis,in 1877 @ Geo.Washington University.1]-in it I
broached what I term the Test theory. I have substituted Sortation for Test(act of
sorting) 2]- I predicted that medical science while accepting as true the greater portion
of alleged facts commonly offered suppoting the mitigation theory,would ultimately
put upon them a widely different interpretation 3]-disbelief in facts re:vaccinated vs.
unvaccinated ,deaths in aa. Group.The central issue is that vaccination mitigates
against attacks of smallpox.--most of the book takes issue on thesestaements..This
book is virtually unread,fine condition-anti -vaccination literature.. #227076E1-
