

THE SMALLPOX VACCINE RACKET ¹

[Vaccination](#)

“Those who don’t know history are doomed to repeat it.” — Edmund Burke

"(Vaccination), a Destroyer of the [Honesty](#) and Humanity of Medicine, which is through it a deeply-degraded Profession."---[Dr Garth Wilkinson \(1883\)](#)

England and Wales
 [1880] "25,000 babies are yearly sacrificed by diseases excited by Vaccination."
 [1921] "6,000 Infants are killed every year by Vaccination."

Anti-Vaccination League

[Start with the [Smallpox Banners](#), then if you can stomach more: [The Smallpox Hoax](#). The largest collection of [smallpox books](#) exposing vaccination on the internet. It is easy to demolish with [statistics](#) (huge epidemics followed high vaccination) and a minute amount of common sense on [Sanitation](#) and [Vaccine Lymph](#), while natural healers such as [Sydenham](#) and [Tilden](#) had remarkable cure rates, one in the 17th century! The city of [Leicester](#) by itself completely exposed vaccination. Smallpox vaccination killed millions by spreading diseases like [Smallpox](#) (declining before vaccination) and [Leprosy](#) around the world ([Vaccine damage](#)), and is a classic example of [George Orwell's](#) dictum: "*Who controls the past controls the future. Who controls the present controls the past.*" They control the present so they just tell people what to think about the past. Numerous books have been written by notable medical men ([Creighton Crookshank Hadwen Collins Pearce Campbell Bayly](#)) and the scientist [Alfred Wallace](#), but you never get to hear about them, an example being given by the Allopaths on [Wikipedia](#), who suppressed any links to their books on this site claiming it was '[spam](#)'!]

'IT IS PATHETIC AND LUDICROUS TO SAY WE EVER VANQUISHED SMALLPOX WITH VACCINES WHEN ONLY 10% OF THE POPULATION WAS EVER VACCINATED.'
-Glen Dettman A.M.M., BA, Ph.D.

[Dettman Ph.D, Glen .](#)

THE VACCINATION RACKET

"The 'victory over epidemics' was not won by medical science or by doctors--and certainly not by vaccines.....the decline...has been the result of technical, social and hygienic improvements and especially of improved nutrition. Here the role of the potato...deserves special mention.....Consider carefully whether you want to let yourself or your children undergo the dangerous, controversial, ineffective and no longer necessary procedure called vaccination, because the claim that vaccinations are the cause for the decline of infectious diseases is utter nonsense."

Dr. Gerhard Buchwald M.D.

Book: 'The Vaccination Nonsense (2004 Lectures)'

[Dr. Buchwald MD](#)

LEICESTER VACCINATION DEATHS

"When we pinned our faith to...vaccination—from 1868 to 1872—no fewer than an annual average of 239 out of every 1,000 infants born died within twelve months of their birth. Now, having seen the error of our ways, and discarded the nostrum, instead of 239 deaths, there is only an annual average of 128 deaths per 1,000 births, or a decrease of 111 per thousand, being a saving of 46 per cent. These figures represent an annual saving of over 600 infant lives each year in Leicester.

The saving of children's lives under five years of age is on the same lines of progress. Whereas in the high vaccination period of 1866-72 there were 107 deaths per thousand living at that age, now there are only 34 per thousand, being a decrease of 73 per thousand, or a saving of 68 per cent. This represents a saving of over 2,200 lives each year of children living under five."

J.T. BIGGS (Sanitary Engineer)

Author: LEICESTER: SANITATION versus VACCINATION (1912)

[Biggs Leicester](#)

"Vaccination is a gigantic delusion; ... it has never saved a single life; ... it has been the cause of so much disease, so many deaths, such a vast amount of utterly needless and altogether undeserved suffering, that it will be classed by the coming generation among the greatest errors of an ignorant and prejudiced age, and its penal enforcement the foulest blot on the generally beneficent course of legislation during our century."

Alfred Russell Wallace (1898)

"There is no question but that perfect sanitation has almost obliterated this disease (smallpox), and sooner or later will dispose of it entirely. Of course, when that time comes, in all probability the credit will be given to vaccination."

John Tilden M.D. (1851-1940)

"It is difficult to conceive what will be the excuse made for a century of cowpoxing; but it cannot be doubted that the practice will appear in as absurd a light to the common sense of the twentieth century as blood-letting now does to us. Vaccination differs, however, from all previous errors of the faculty, in being maintained as the law of the land on the warrant of medical authority. That is the reason why the blow to professional credit can hardly help being severe, and why the efforts to ward it off have been, and will continue to be so ingenious."

Charles Creighton M.A., M.D. (1889)

[Creighton,Dr](#)

"It is nonsense to think that you can inject pus-and it is usually from the pustule of the dead smallpox victim; that is the basis of it; we used to think it was from cowpox, but the manufacturers deny that and say the most reliable form originates in the pustule of someone who had died from smallpox—it is unthinkable that you can inject that into a little child and in anyway improve its health."

Dr. William Howard Hay (1937)
