

Wyeth Lederle quotes

[Wyeth Lederle](#)

Sodium cyanide is used in the Prevnar manufacturing process, but trace amounts remain in the vaccine itself, according to Livingston. There are in fact, he says, many toxic substances in vaccines. "Mercury, lead, aluminum, cyanide, it's not a pretty picture," Livingston warns, "for a child's immune system, for unsuspecting parents and caregivers, who are never told about the presence of these chemicals, and for employees who have to keep their mouths shut or face losing employment," he adds." "According to one memo, SV40 was found in three of 15 lots of the oral vaccine seven months after the federal directive was issued in March 1961. Lederle released the contaminated vaccine to the public anyway, the memo shows. The documents also suggest that the company failed to test the monkey- kidney seed strains used to make the bulk polio vaccine for contamination, despite a written warning from Dr. Albert Sabin, who developed the oral vaccine."--[Media](#)

"Last night the National Meningitis Trust, sponsored by Wyeth, was drawn into the controversy when it refused to disclose how much money it received from the giant drug company."--[Media report on meningitis C vaccine](#)

"Dr David Goldblatt of the Institute of Child Health, has served on an expert advisory panel for Wyeth and received research grants from Wyeth and North American Vaccines, which produces a third meningitis C drug to be introduced this year."--[Media](#)

"Wyeth's designated lot 64201 was voluntarily withdrawn by the manufacturer after a cluster of 11 deaths in Tennessee in 1979.....Within 8 days of their DPT inoculation, 11 infants died in Tennessee. Nine of the 11 had received DPT vaccine from Wyeth Laboratories lot 64201. Four of the 11 were dead in 24 hours."---[Fresno Bee DPT report 1984](#)

"Dr. Samuel **Katz** of Duke University has served as chair of both the **ACIP and the Red Book committees**. He co-chairs a group called the Vaccine Initiative, which is an information and advocacy group that benefited from start-up funds from at least six vaccine manufacturers. He is listed as an advisory board member to the Immunization Action Coalition (which includes the Coalition for Hepatitis B), an advocacy group that receives funding from several vaccine makers, including SmithKline Beecham, Merck and Wyeth-Lederle.....Dr. Neal Halsey of Johns Hopkins University <http://www.vaccinesafety>. Like Katz, he is a vaccine pioneer and served on ACIP and the Red Book committees. He, too, is an advisor to the Immunization

Action Coalition and the Hepatitis B Coalition. Halsey is also director of the Institute for Vaccine Safety, which he founded at Johns Hopkins to provide a forum on vaccine safety, among other things. According to a Johns Hopkins' spokesperson, the institute receives funds from Merck, SmithKline Beecham, North American Vaccines, Connaught/Pasteur Merrieux and Wyeth-Lederle."----Nicholas Regush

"Still persisting in my inquiries, the issue came up that vaccine manufacturing was an essential component of industry, this country's (U.S.) protection against potential biological warfare. A number of companies had given up making vaccines. It's an economically risky business. If one criticizes, in this case, Lederle, too much and they stop production, then all the production will go to Switzerland. The Swiss would then be bought out by the Russians, and then there will be biological warfare...That stays as a memory of the way the government works... I have approached individuals to try and understand why that system would operate like that. The major explanation was that the regulatory authorities are controlled by and depend on the industry, and so, industry growth, if you want, calls the shots."--[Dr Martin](#)

"Four of the medical experts advising the Government on whether the new meningitis C vaccine is safe have links to one or more of the drug companies that produce it.....Professor Janet Darbyshire, a member of the Government's Committee on Safety of Medicines, had received support for academic research from US firms **Wyeth** and Chiron, who produce the two main meningitis products being used on children in Britain....three members of the Joint Committee on Vaccination and Immunisation had declared interests in vaccine manufacturers...Dr David Goldblatt of the Institute of Child Health, has served on an expert advisory panel for **Wyeth** and received research grants from Wyeth and North American Vaccines, which produces a third meningitis C drug to be introduced this year. Another, Professor Keith Cartwright of the University of Bristol, received funding from the drug industry to 'evaluate candidate meningococcal vaccines'.
